

Choose the air-to-air system that suits your home

Pretium groups Daikin and Mitsubishi Electric wall units by what you are choosing for. These groups are ours. They are not the manufacturers' own classes, and they are not a price ladder.

A later group is not a promise of lower running cost, lower noise, more features, or a higher price.

Features checked against UK manufacturer information, October 2026.

START HERE

Four groups, four priorities

Pick the group that matches what matters most to you, then compare the ranges inside it.

Essential

Everyday comfort. All year round.

Choose when you want a practical, dependable solution for everyday room comfort.

DAIKIN
Sensira

MITSUBISHI ELECTRIC
Classic

Balanced

A considered balance for everyday living.

Choose when useful everyday features matter most.

DAIKIN
Comfora · Perfera
MITSUBISHI ELECTRIC
Elegance

Enhanced

Comfort that complements your home.

Choose when the unit's appearance is an important part of the decision.

DAIKIN
Stylish
MITSUBISHI ELECTRIC
Zen

Premium

Refined comfort, tailored to your priorities.

Choose when a specialist capability, or a distinctive design, is what you are choosing for.

DAIKIN
Emura · Ururu Sarara
MITSUBISHI ELECTRIC
Premium · Premium Plus

What every group gives you

**Heating**
Warmth through the colder months.

**Cooling**
Comfort on hot days and nights.

**Removes moisture**
A dry mode for humid, muggy rooms.

**Dust filter**
Filters air circulating through the unit.

THE RANGES

What sits in each group

01

Essential
Everyday comfort. All year round.

Straightforward heating, cooling and moisture removal from a leading brand. Practical white styling, standard dust filtration and easy everyday controls.

 **Choose Essential when** you want a practical, dependable solution for everyday room comfort.

DAIKIN

Sensira FTXF-F

Straightforward heating, cooling and dry mode, with Wi-Fi built in.

 **Wi-Fi built in**

 **Onecta app**

 **Dust filter**

☐ White

— Airflow moves up and down only.

MITSUBISHI ELECTRIC

Classic MSZ-HR

Practical heating, cooling and dry mode in a white unit.

 **Dust filter**

 **Wi-Fi interface optional**

 **Plasma Quad Connect can be added**

☐ White

— Wi-Fi is an optional interface, not part of the standard unit.

— Classic multi-room systems use the Classic outdoor range.

Balanced

A considered balance for everyday living.

A useful mix of airflow, filtration and control, in clean, understated styling. Each range has its own combination.

✓ **Choose Balanced when** useful everyday features matter most.

DAIKIN

Comfora FTXP-N9

Automatic airflow in both directions and extra filtration.

- ↕ Airflow up and across
- 🛡 Silver allergen filter
- 📶 Wi-Fi built in
- White

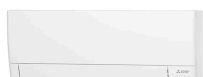

DAIKIN

Perfera FTXM-A

Airflow in both directions, a silver allergen filter, Flash Streamer and a motion sensor.

- ⚡ Flash Streamer
- 👁 Motion sensor directs air away from people
- 🛡 Silver allergen filter
- 📶 Wi-Fi built in
- White

MITSUBISHI ELECTRIC

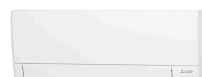

Elegance MSZ-AY

Smaller sizes · 1.5 to 5.0 kW

Understated styling with a matt finish and a self-cleaning mode.

- 📶 Wi-Fi built in
- 🛡 V-Blocking filter
- 🔄 Self-cleaning mode
- 🛡 Dual-barrier coating
- White

-
- Matt finish.
 - The 1.5 kW indoor unit is for a multi-room system only.

MITSUBISHI ELECTRIC

Elegance MSZ-AP

Larger sizes · 6.0 and 7.1 kW

The larger Elegance sizes, for bigger rooms.

- 📶 Wi-Fi built in
- 🛡 V-Blocking filter
- White

-
- The matt finish, self-cleaning mode and dual-barrier coating belong to the smaller range only.

Enhanced

Comfort that complements your home.

Design for a wall you see every day. Slim or compact profiles, and a choice of finishes.

✓ **Choose Enhanced when** the unit's appearance is an important part of the decision.

DAIKIN

Stylish FTXA-C

A compact profile in three finishes.

- ✶ Flash Streamer
- 🛡 Silver allergen filter
- 🌡 Intelligent thermal sensor
- 📶 Wi-Fi built in

○ White ● Silver ● Black

- It does not have an occupancy sensor.

MITSUBISHI ELECTRIC

Zen MSZ-EF

A slim front in three finishes. Zen is in this group for its design.

- 📶 Wi-Fi built in
- 🛡 V-Blocking filter

● Black ● Silver ○ White

- It does not scan the room.
- The 1.8 kW indoor unit is for a multi-room system only.

Premium

Refined comfort, tailored to your priorities.

Distinctive design or a specialist climate-control capability. Each range is here for its own reason. Active air treatment is part of every range in this group. Fresh air, added moisture and R290 belong to particular ranges.

✓ **Choose Premium when** a specialist capability, or a distinctive design, is what you are choosing for.

DAIKIN

Emura FTXJ-A9

A sculpted unit in three finishes.

- ✦ Flash Streamer
- 🛡 Silver allergen filter
- 🌡 Intelligent thermal sensor
- 📶 Wi-Fi built in

○ White ● Silver ● Black

— It does not have an occupancy sensor.

DAIKIN

Ururu Sarara FTXZ-N with RXZ-N

Heats, cools and removes moisture without the same swing in room temperature. Brings in fresh outdoor air, and adds moisture taken from outdoor air when the room is dry.

- ⇄ Fresh outdoor air
- 💧 Adds moisture
- ✦ Flash Streamer
- 👁 Motion sensor
- ↺ 3D airflow
- 🔄 Self-cleaning filter

○ White

— One matched pair.
— Wi-Fi is an optional adapter, not built in. The app works when that adapter is fitted.

MITSUBISHI ELECTRIC

Premium MSZ-LN

One 3D i-see sensor reads where people are and how temperature is spread across the room, and the two airflow vanes move independently.

- ✦ Plasma Quad Plus built in
- 👁 3D i-see sensor
- 📶 Wi-Fi built in

● Ruby red ● Onyx black
○ Pearl white ○ Natural white

— The 1.8 kW indoor unit is for a multi-room system only.

MITSUBISHI ELECTRIC

Premium Plus MSZ-RZ

An R290 system in a matched pair, with an emphasis on heating in colder weather. Cooling capacities of 2.5, 3.5 and 5.0 kW, each with its own outdoor unit.

- 🌿 R290 refrigerant
- ✦ Plasma Quad Plus built in
- 👁 3D i-see sensor
- 🛡 Integrated refrigerant leak sensor
- 📶 Wi-Fi built in

○ White ● Matt black

— Not combined with a conventional R32 multi-room outdoor unit.

 Elegance, Zen and Premium also have a small indoor size that connects only to a multi-room outdoor unit: Elegance 1.5 kW, Zen 1.8 kW and Premium 1.8 kW.

 Premium Plus sizes are 2.5, 3.5 and 5.0 kW cooling, each with its matching R290 outdoor unit.

What the features mean

Removes excess moisture

A dry mode that lowers humidity. On Ururu Sarara this is done without the same change in room temperature. On the other ranges it is ordinary dry operation.

Standard filtration

A dust filter on the air passing through the unit.

Silver allergen filter

An extra filter on the current Comfora, Perfera, Stylish and Emura ranges. It is not the same thing as Flash Streamer.

Flash Streamer

Daikin's active air treatment, beyond the dust filter. It is not a medical-performance claim.

Plasma Quad Plus

Mitsubishi Electric's built-in plasma treatment on Premium and Premium Plus. It is not a medical-performance claim.

Plasma Quad Connect

A separate Mitsubishi Electric device that can be added to Classic, Elegance and Zen. It is not fitted unless the quotation includes it.

V-Blocking filter

The filter on current Elegance and Zen models. It is not Plasma Quad.

Occupancy or motion sensing

Detects people and can send airflow elsewhere, or ease off when the room is empty.

Intelligent thermal sensor

On Stylish and Emura, extra sensing that helps direct warm or cool air. These two do not use the same sensor, and neither is the Mitsubishi Electric 3D i-see sensor.

3D i-see

One Mitsubishi Electric sensor on Premium and Premium Plus. It reads occupancy and temperature distribution. It is not two sensors.

App control

The manufacturer's app, Onecta for Daikin and MELCloud Home for Mitsubishi Electric. It needs the Wi-Fi described for that range, plus your own internet connection.

Fresh air

Outdoor air brought in by the unit. Only Ururu Sarara does this. The other wall units recirculate the air already in the room.

Humidification

Moisture added to a dry room. Only Ururu Sarara does this, and it is separate from dry mode.

BEFORE YOU CHOOSE

Good to know

Warranty

The manufacturer's warranty, and Pretium's installation warranty, are shown on the offer you select. The group does not set the manufacturer's warranty period.

Groups are not cumulative

Balanced Perfera includes sensing and active air treatment that are not standard on Enhanced Zen. A later group does not include everything from an earlier one.

Matched pairs and multi-room

Ururu Sarara and Premium Plus are matched pairs. Classic multi-room systems use the Classic outdoor range. The other ranges connect to their own manufacturer's multi-room outdoor units, up to the combinations listed for that indoor model.

Installation matters at every group

Room suitability, installation quality and a clear handover matter as much as the unit you choose.

Not sure which suits your room?

Ask Current, our assistant, on the air-to-air page. It can talk through your rooms and priorities, and you decide what goes on your offer.
